Coulson Quality Service

It is our mission to provide our customers with the best quality service available in the industry. Whether performed in our fully-equipped service shop or on location in the field, our service technicians stand ready to assist our customers with all of their repair and rebuild needs.

Compressor Repair and Rebuild

We offer compressor repair and rebuild on most makes, models and brands. From basic reciprocating units to complex rotary screw compressors, we are committed to timely addressing your mechanical issues. Whether a quick emergency repair, or a complete overhaul to like-new condition, try us for your next service requirement.

Engine Repair and Overhaul

Many shops in the industry provide minor engine repair and tune-up service. Very few can offer quality machine work from the oil pan to the valve cover. We perform complete engine repair and overhaul service on most small to medium horsepower engines.

We do that!

In addition to compressor and engine repair we also offer service on the following:

- Repair of electric motors up to 50 hp
- Pump jack gearbox repair
- Magneto repair
- Alternator and starter repair
- Cylinder sleeving and machining
- Electrical service and repair on location

When it comes time to trust the repair of your expensive equipment to others, think about choosing a shop that maintains control over the entire overhaul process. We do that!

Reconditioned Intake and Exhaust Valves

Reconditioned Crankshaft

Reconditioned Cylinder Head
